

Exercice 1 – Longueur d'une liste

```
notes = [12, 15, 9, 18, 7, 14]
print(notes)
print(len(notes))
if len(notes) > 5:
    print("La liste contient plus de 5 elements")
else:
    print("La liste ne contient pas plus de 5 elements")
for n in notes:
    print(n)
```

```
[12, 15, 9, 18, 7, 14]
6
La liste contient plus de 5 elements
12
15
9
18
7
14
```

Exercice 2 – Utilisation de range

```
liste = list(range(1, 11))
print(liste)
for n in liste:
    if n % 2 == 0:
        print(n)
c = 0
for n in liste:
    if n >= 6:
        c = c + 1
print(c)
```

```
[1, 2, 3, 4, 5, 6, 7, 8, 9, 10]
2
4
6
8
10
5
```

Grand Exercice 1 – Analyse de notes

```
notes = [11, 14, 9, 16, 7, 18, 13, 10, 5, 19]
print(len(notes))
print(sum(notes)/len(notes))
c = 0
for n in notes:
```

```
        if n >= 10:
            c = c + 1
print(c)
copie = notes.copy()
for i in range(len(copie)):
    if copie[i] < 10:
        copie[i] = 10
print(notes)
print(copie)
```

```
